1-day workshop: The new WU-Campus Experience the Qi of Vienna!

Thursday 10. April 2014 | 10 am – 5 pm

A place for business, education and science - experience the WU-Campus with International Feng Shui expert Howard Choy.

The knowledge about the interaction of buildings, the Qi and the Five Elements is the basis of how we perceive our living spaces. The new Vienna University of Economics – a city within the city – offers a stunning setting for an environment analysis.

We start to refresh your Feng Shui knowledge in a short general theory part with Howard Choy. You'll learn how a Qi-environment analysis is performed in a clear and systematic manner. In the afternoon we study on site one of Vienna's major project in recent years. Different building shapes and designs, numerous functionalities and a variety of different people – WU-Campus, an area with a challenge.

Get to know Vienna from a different angle.

We are looking forward to an exciting day together with lots of fun and new impressions, Edith Anna Feldhofer und Maria Husch
